

Although people knew **OPCs** **EXISTED IN NATURE**, in **1947** I was the first to isolate them and developed an industrial extraction method for specific OPCs rich extracts.

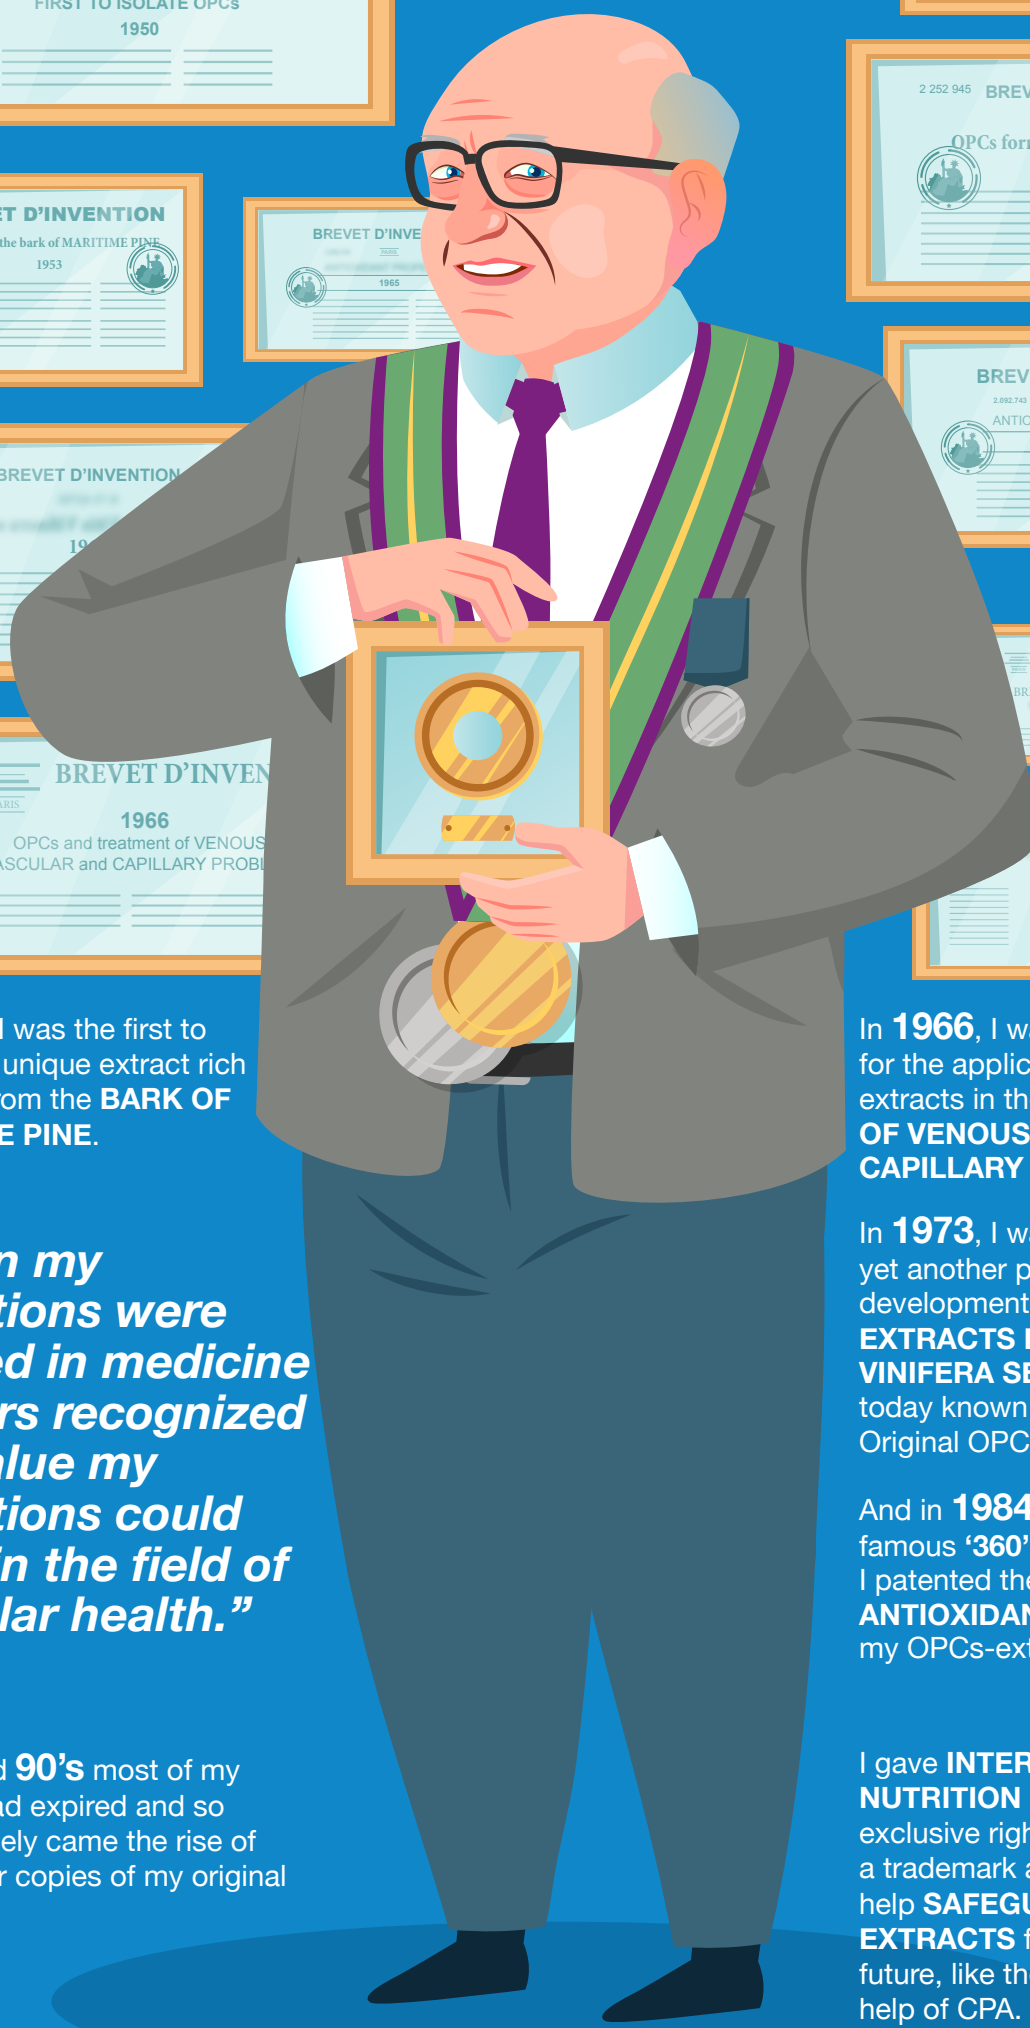

The **FIRST PATENT** for this achievement, was awarded to me in **1950**. Since then 9 more patents followed over a period of 40 years of scientific research.

In **1953**, I was the first to develop a unique extract rich in OPCs from the **BARK OF MARITIME PINE**.

“When my inventions were applied in medicine doctors recognized the value my inventions could have in the field of vascular health.”

By the mid **90's** most of my patents had expired and so unfortunately came the rise of many poor copies of my original extracts.

In **1966**, I was granted a patent for the application of my OPCs extracts in the **TREATMENT OF VENOUS, VASCULAR AND CAPILLARY PROBLEMS**.

In **1973**, I was awarded yet another patent for the development of OPCs rich **EXTRACTS FROM VITIS VINIFERA SEEDS** a.o. the extract today known as MASQUELIER's® Original OPCs.

And in **1984** I was awarded the famous **'360' PATENT**, in which I patented the extraordinary **ANTIOXIDANT PROPERTIES** of my OPCs-extracts.

I gave **INTERNATIONAL NUTRITION COMPANY B.V.** the exclusive rights to use my name as a trademark and my signature, to help **SAFEGUARD MY ORIGINAL EXTRACTS** for consumers in the future, like they do today with the help of CPA.
